

Code No: R05010106

R05**Set No. 2****I B.Tech Examinations, December-January, 2011-2012****C PROGRAMMING AND DATA STRUCTURES****Common to CE, BME, IT, AE, ICE, E.COMP.E, ETM, E.CONT.E, EIE,
CSE, ECE, CSSE, EEE****Time: 3 hours****Max Marks: 80****Answer any FIVE Questions
All Questions carry equal marks**

1. Write a C program using pointers to implement Queue with all operations. [16]
2. Write a C program to add the two given complex numbers. Define functions add and print with pointers as arguments. The complex number is a structure object with real and image fields. [16]
3. (a) Write a program to sort the set of strings in an alphabetical order?
(b) How are multidimensional arrays defined? Compare with the manner in which one-dimensional arrays are defined. [10+6]
4. (a) What is the difference between signed integer and unsigned integer in terms of memory and range.
(b) List the entire data types in C. What is the size of each of these data types. [8+8]
5. (a) Write a C program to sort the elements of an array using Quick sort with suitable example.
(b) What is the worst case and best case time complexity of the above program? [8+8]
6. (a) What is the use of fseek()? Explain its syntax.
(b) Write a program to copy the contents of one file to another file. [6+10]
7. Write a function in 'C' to insert an element after the n^{th} element of a list. [16]
8. (a) Define a pointer. What are the advantages of using a pointer?
(b) Write a program to change all uppercase letters in a file to lower case letters and vice versa. [6+10]

Code No: R05010106
