

Code No: R07A1EC04

R07**Set No. 2****I B.Tech Examinations, Dec.-Jan., 2011-2012****COMPUTER PROGRAMMING****Common to Mechanical Engineering, Mechatronics, Production
Engineering, Automobile Engineering****Time: 3 hours****Max Marks: 80****Answer any FIVE Questions
All Questions carry equal marks**

1. Explain an array, array declaration and features of array. [16]
2. (a) What are the commonly used Input / Output functions used in 'C'? How they are accessed?
(b) What is the standard Input / Output header files in 'C'? How it is used? [10+6]
3. What is the advantage of binary search compared to linear search. Write a program to perform binary search? [16]
4. (a) Discuss the History of 'C' language.
(b) Write the structure of 'C' program and explain. [6+10]
5. What is the need for function? Explain about pre defined function with an example. [16]
6. Explain the operation of sequential access file, mention its advantage and disadvantage with example. [16]
7. (a) Write notes on bit field.
(b) Write a program to print marks, grade and their address using union. [6+10]
8. Write an algorithm to create binary search tree using Depth First Tree. [16]
